EASY**

RENTAL PROGRAM

When you have an unexpected or temporary need for fall protection, Malta Dynamics can help. Our rental program includes access to our most popular fall protection equipment, allowing you the flexibility to enjoy the safety of our quality, professionally tested products without having to purchase or maintain them yourself.

Renting is a cost-effective alternative when you need fall protection temporarily or are not yet ready to commit to a purchase. Our affordable rental program offers you flexibility and peace of mind when an unexpected or short-term need for fall protection arises.

RENTALS MADE EASY

3

BENEFITS OF RENTING

- Quick access to fall protection to remain compliant with OSHA standards
- Save money on equipment needed only temporarily
- Receive equipment that has been pre-inspected and is ready to use immediately
- Rentals may qualify as a deductible operating expense
- No commitment—keep your equipment as long as you need it and return it when finished
- Guarantee that all equipment is professionally tested and maintained
- Keep your projects on budget

PRICING

Pricing for rentals is based on how long you keep the equipment to use. We begin your rental fee from the day the product reaches the shipping location you specify. Your rental charges stop on the day the equipment is returned to Malta Dynamics.

ENGINEERED DAVIT ANCHORS

A davit anchor is an engineered anchorage system and at Malta Dynamics we offer several XSERIES davit models that suit a range of applications from permanent solutions to easily movable temporary solutions. The davits we offer can be used in a wide variety of situations from offloading flatbed trucks and maintaining tanker trucks to maintenance in facilities. Each unit requires minimal space and features a quick assembly process. We also offer davit solutions with 360 degrees of rotation for the worker that needs mobility without having to disconnect and connect to multiple anchor points as they move.

X500

The X500 is extremely compact, measuring in at 6'2"x6'2", and offers 5,950 pounds of anchor weight. The X500 is perfect for loading and unloading situations, inside or outside. Because the free-standing fall protection system always keeps the anchor point above the worker, it significantly reduces the possibility of a hazardous swing fall.

Daily	Weekly	Monthly
\$300	\$1200	\$2500

X550

The X550 provides a fixed overhead anchor point for one worker up to 22' in the air and uses the weight of your truck as a counterweight. The X550 is easy to operate and takes up less than 7.5'x7.5' of floor space. The X550 meets ANSI Z359.6-2016 and 2019 IBC and is compliant with OSHA's fall protection rules. This entire fall protection system weighs in at just 2,271 lbs. and provides reliable overhead anchorage for a worker weighing from 130-310 lbs. The overhead arm on the X550 reaches out 7'6" and workers can operate safely within a 30 degree radius.

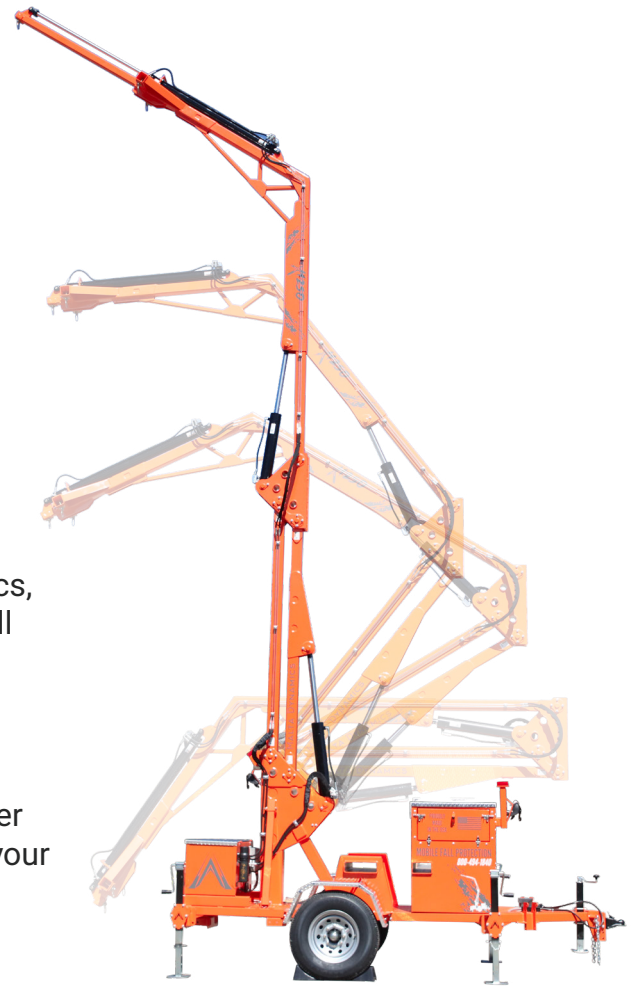

Daily	Weekly	Monthly
\$325	\$1250	\$2450

XSERIES MOBILE GRABBER

Needing overhead fall protection only temporarily or on short notice may not justify more expensive solutions. Renting an XSERIES Mobile Grabber from Malta Dynamics, however, gives you access to top-of-the-line overhead fall protection for as long as you need it, without having to commit to a purchase.

As our network of available XSERIES units continues to expand throughout the United States, it is easier than ever to request a rental XSERIES Mobile Grabber that meets your exact need, when you need it.

X1250

Our X1250 provides three overhead anchorage points. The extendable mast gives an additional five feet of reach for one worker, offering overhead tie-off up to 34 feet in the air. The X1250 is also road-towable, and features an electric-driven hydraulic lift system operated by remote control.

Daily	Weekly	Monthly
\$500	\$2200	\$5000

X1270

The X1270 operates on a folding, reinforced steel mast, controlled by multiple synchronized hydraulic cylinders. This allows the same protection at 20 feet for 2 users, or fully extended at 45', and any height in between.

The battery powered X1270 is designed for easy set-up. Workers can adjust the manual outrigger jacks, tie-off, and work with confidence to get the job done.

Daily	Weekly	Monthly
\$600	\$2800	\$6000

X1000

Our X1000 fall arrest system provides two overhead anchorage points up to 22 feet in the air. This mobile unit is road-towable by nearly any vehicle on the market. The X1000 model is manually operated by a hand-pumped hydraulic system, providing the most cost-effective way to ensure workers always have an overhead anchorage—anytime, anywhere.

Daily	Weekly	Monthly
\$300	\$1300	\$3000

EDGE GRABBER

The X250 is a free-standing, 2-user mobile fall protection system used on flat roofs, and over trenches. The anchors are designed to provide fall protection over an edge while having an option for confined space rescue and retrieval.

X250

This XSERIES model is an ideal solution for people with a need for fall protection on flat rooftops. It can also be used for trench safety/ confined spaces. The X250 provides fixed overhead fall protection for two workers in fall arrest to eliminate foot level tie-off, and uses its length and a removable weight box to counterbalance the anchorage support for the user operating over the edge.

Daily	Weekly	Monthly
\$325	\$1250	\$2450

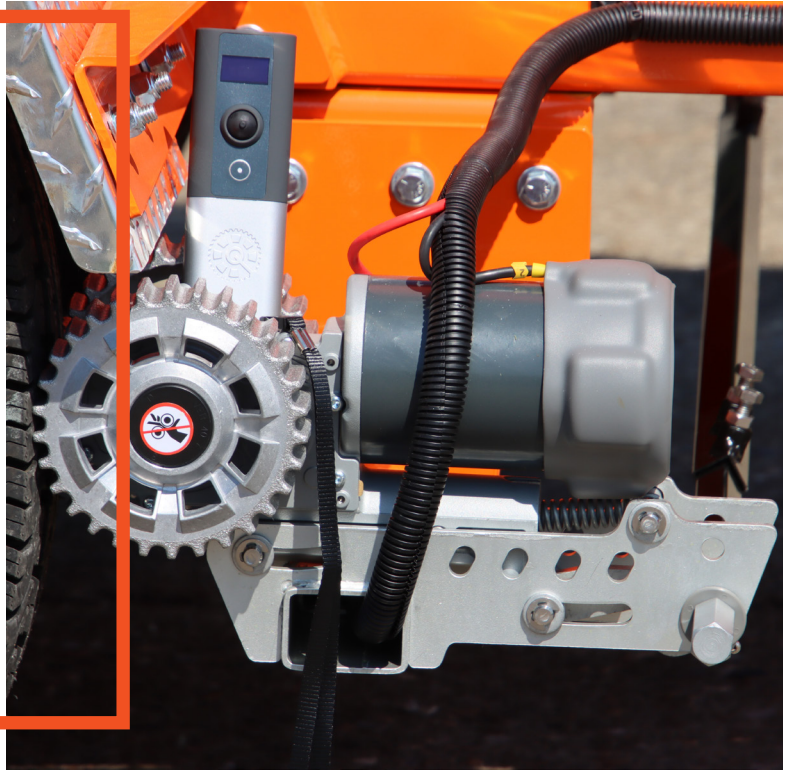

XSERIES OPTIONS

M1000

The Malta Dynamics Mobile Grabber GO! Friction Drive Mobility Package (M1000) adds wireless, independent mobility to the unit. Our system attaches two independent electric motors to the XSERIES that drives its wheels, allowing you to position the Grabber without a vehicle attached.

Weekly	Monthly
\$150	\$400

R1000

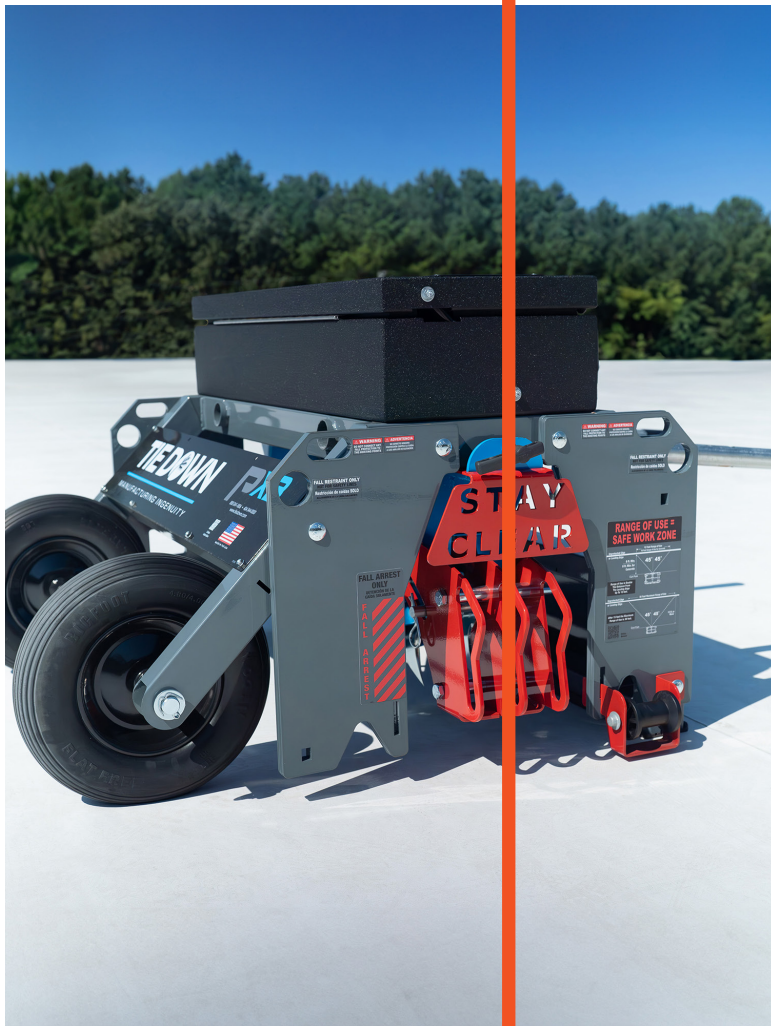

This optional kit for confined space rescue and retrieval can be installed on any XSERIES Mobile Fall Protection system to satisfy the OSHA requirement for rescue/retrieval for confined spaces. The R1000 kit not only provides fall protection but also includes bi-directional winching capabilities, allowing an attendant to rescue a worker in need by raising or lowering them to a safe level.

Weekly	Monthly
\$250	\$600

PX3 ROOFCARTS

Introducing the PX3 mobile fall protection system – a game-changer in portability. Weighing 45% less than other options on the market at just 430 lbs, the PX3 is designed for unmatched ease of use. Lift it into place, click off quickly, and get to work. Need to relocate? No problem. This best-in-class solution can handle up to five workers simultaneously, with three in fall arrest and two in fall restraint. What's more, it ships job site ready on a standard pallet, ensuring efficiency and convenience at every step. The PX3 – where portability meets performance.

ROOFCARTS

The PX3 is a versatile fall protection solution for TPO, EPDM, metal, and built-up roofing. This system supports five users, with three in fall arrest and two in fall restraint. Weighing just 430 lbs., it's compact with a 40" x 48" footprint and ships job site ready. The unit includes a locking toolbox, premium 300 lbs. flat-free tires with a 1200 lbs. capacity, and four lifting rings for rigging. Elevate safety effortlessly with this comprehensive solution.

Daily	Weekly	Monthly
\$300	\$600	\$1200

SELF-RETRACTING LIFELINES

Self-retracting lifelines - also referred to as retractable fall arresters, fall arrest lifelines, fall protection yoyos, fall arrest blocks and self-retracting lanyards- have been expertly designed to detect when a worker is about to fall and tightens the cable to a halt. They work like a seatbelt, when you pull on the line lightly it pays out and retracts smoothly, but when you abruptly yank the line, the system stops and thus arrests the fall to stops the wearer from encountering a potentially life-threatening injury.

SELF-RETRACTING LIFELINES

If you need self-retracting lifelines on short notice or for a limited time, consider renting SRLs from Malta Dynamics. You can rent an SRL for as little as \$75 per week, making it a cost-effective way to enjoy the protection of our SRLs even for a temporary need.

Best of all, we'll inspect the SRLs for you and ship them straight to your jobsite ready to use. We'll handle any repairs and return inspections for you, too, making SRL rental an easy, no-hassle solution for your fall protection needs.

Product	Description	Length	Daily	Weekly	Monthly
C9000	Hybrid Hog SRL	20 ft.	\$35	\$75	\$175
C9001	Hybrid Hog SRL	30 ft.	\$35	\$75	\$175
C7002	Warthog Series SRL	50 ft.	\$50	\$110	\$250
C7003	Warthog Series SRL	100 ft.	\$95	\$215	\$475

TRIPOD & WINCHES

At Malta Dynamics, we know that work at heights is just part of the world of hazards that exist for fall protection, sometimes the fall hazard happens in a confined space or below the ground level. This fall hazard scenario is an important factor to consider when preparing for fall protection precautions. The use of tripods and winches allows for a worker to be raised or lowered to safety within a confined space or below the surface of the ground.

Tripods accommodate a variety of fall arrest devices and winches. When you rent a tripod from Malta Dynamics, we offer two options for standard use with our rental tripod units.

TRIPOD

Malta Dynamics Tripod is designed to provide an anchor point to support one worker up to 310 lbs. The aluminum alloy tripod can be used with optional winches to provide safe access and emergency rescue in confined spaces including sewers, wells, tanks, underground pipe and tunnels.

Daily	Weekly	Monthly
\$60	\$120	\$240

3-WAY RESCUE SRL

The Confined Space Rescue/Retrieval Kit provides both fall protection and bi-directional winching capabilities. This enables the rescue a worker in need, allowing you to raise or lower them to a safe level. This winch kit can be attached to our standard tripod for confined space use.

Daily	Weekly	Monthly
\$40	\$180	\$400

MATERIAL/ MANHANDLING WINCH

Our standard winch is designed for personnel riding, material handling, rescue and evacuation. It includes a 115-foot galvanized steel rope and a maximum working load of 300 lbs. Personal fall arrest systems should be used in conjunction with the winch.

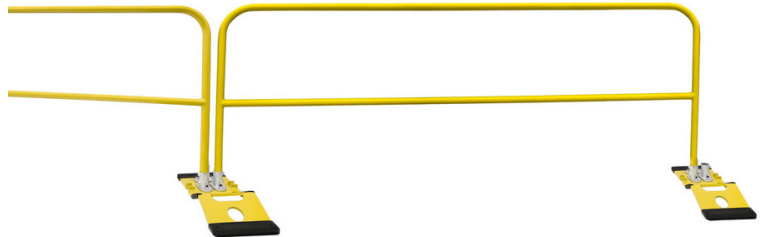

Daily	Weekly	Monthly
\$40	\$180	\$400

UNIVERSAL GUARDRAIL

Guardrail systems can be used around roof openings and at the roof perimeter. Identifying the most common rooftop safety hazards and providing safety training to workers is imperative to ensure a safe workplace.

Our Universal Guardrail is fast and easy to install, and provides fall protection for workers near roof edges. Works on flat, level roofs with a maximum pitch of 1/2 in. per foot (.5/12). Each rental includes 110' of guardrail and installation hardware.

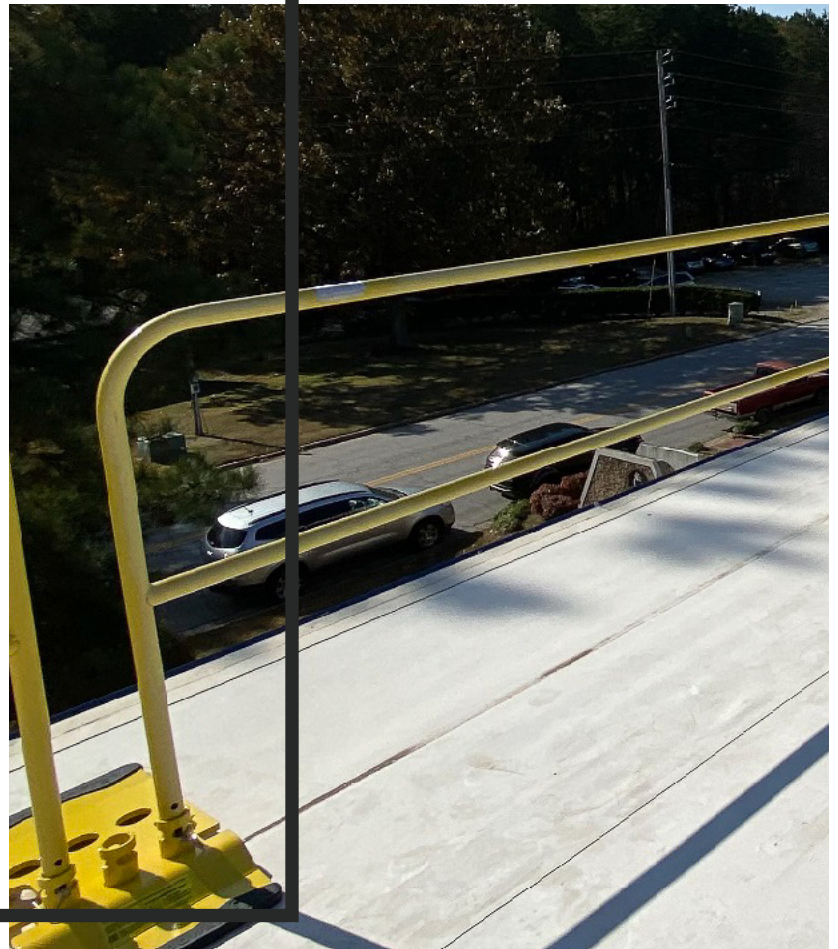

GUARDRAIL

Malta Dynamics offers lightweight temporary fall protection guardrails to make your site safer. This equipment helps protect your workers by preventing falls from hazardous edges. It's easy to install our temporary guardrail posts. This lightweight product is also designed for stacking, enabling workers to transport several of them simultaneously. Our guardrail posts have no welds, making them more durable than other options. New OSHA rule in affect: Walking-Working Surfaces, 1910.28, please consult this as well as all local, State and Federal OSHA rules.

Weekly	Monthly
\$350	\$800

HORIZONTAL LIFELINES

BEAM STANCHIONS

Simple setup, our fall-arrest stanchions, and bases can be installed with no special tools—the bases consist of a clamp and a large wing nut. Engineered from durable zinc-plated steel, this fall-prevention equipment endures even in harsh environments.

This post for steel I-Beams Horizontal Lifeline systems are precision-engineered and tested to meet OSHA regulations to help ensure that you and your team are always protected.

Weekly	Monthly
\$250	\$600

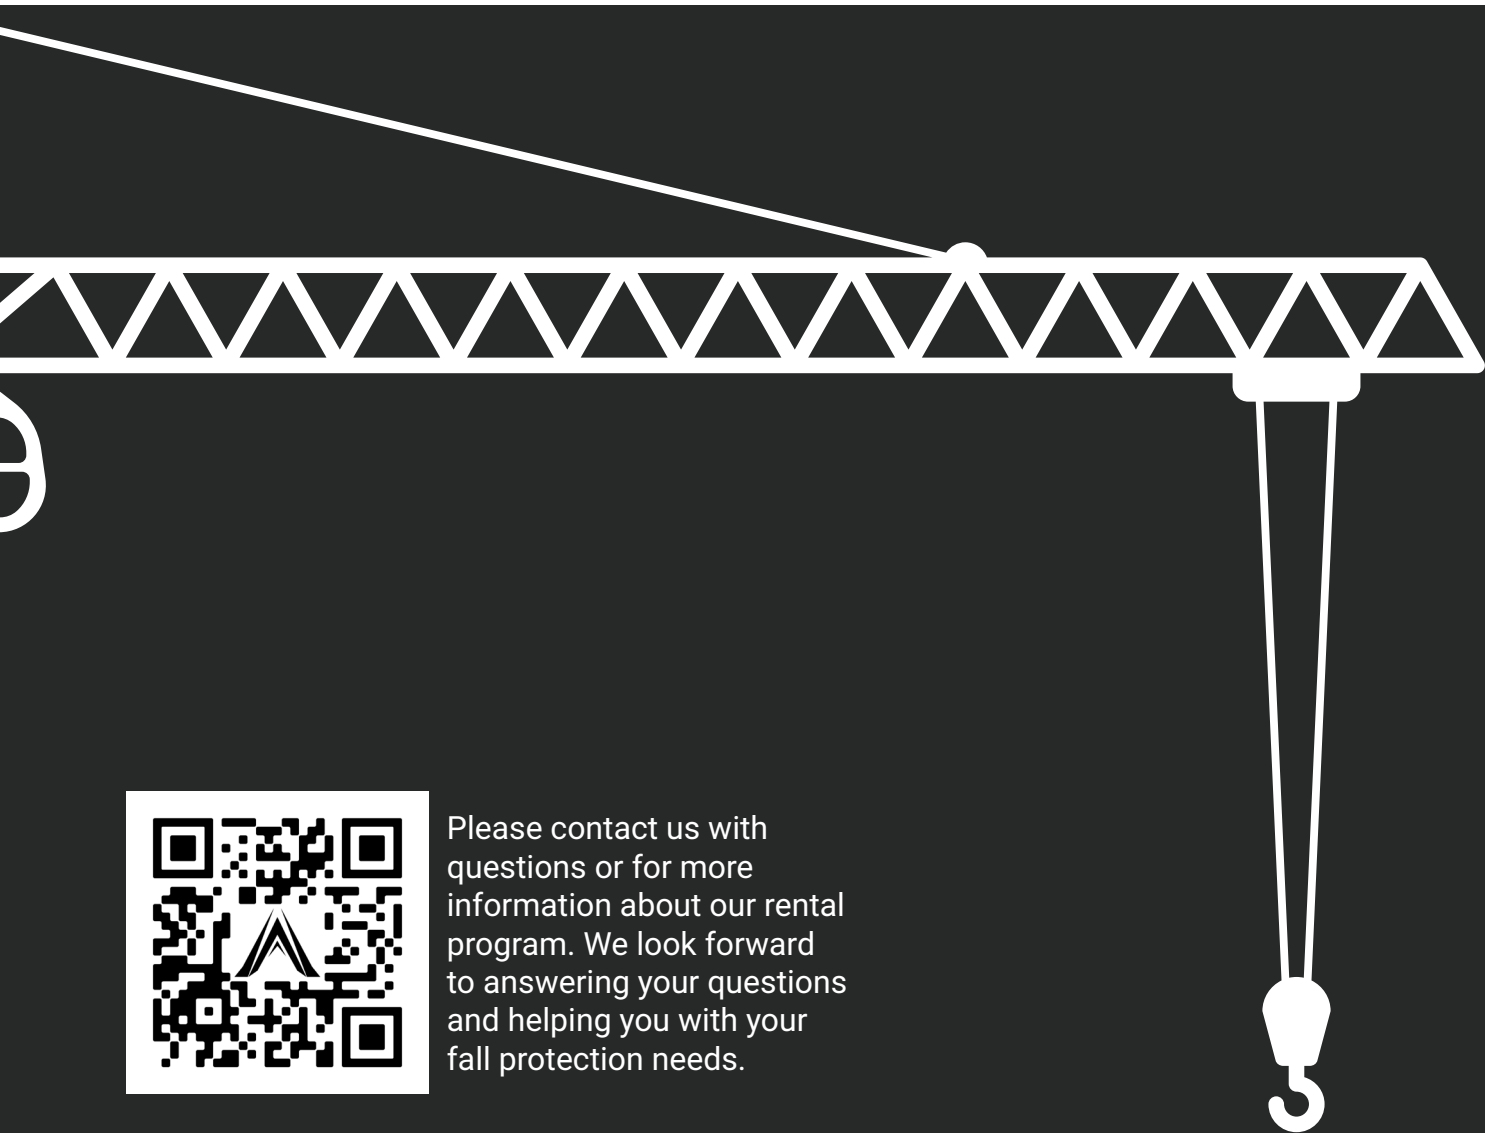

HLL BAG

The entire temporary horizontal lifeline system fits in this bag and weighs only 22.9 lbs. The system can be assembled and removed within minutes with the included tensioning device and wrench; no additional tools are required for the set-up process. The 100' lifeline is made from 5/8" double braided kermantle rope and offers protection for up to 4 users at the same time. The metal materials for the connectors and tensioning device are corrosion resistant and sturdy enough for repeated use from one jobsite to the next. The components included in this horizontal lifeline bag are easy to use and OSHA compliant.

Weekly	Monthly
\$200	\$400

Please contact us with questions or for more information about our rental program. We look forward to answering your questions and helping you with your fall protection needs.
