

HUNTER'S ELITE

By MALTA DYNAMICS

HUNTER'S ELITE ULTRALIGHT YOUTH HUNTING HARNESS KIT

The Hunter's Elite Ultralight is the harness you don't notice you have on, providing an ultralight fit and comfortable movement for ensured safety. The minimalistic design features premium breathable padding on the back, shoulders, and legs with 1" webbing, weighing just over two pounds. This harness features easily adjustable quick-connect attachments at the chest and legs, so you can get into and out of your harness quickly. The shoulder area is equipped with webbing for attaching pouches, clips, rings, and keepers for hands-free access to binoculars, range finders, and other gear.

Hunting safety is often overlooked but the Ultralight Harness was crafted with the avid hunter in mind. Available in two TrueTimber camouflage patterns, Hunter's Elite harnesses are designed to help you blend into your surroundings while staying safe from a fall. Breathable padding keeps sweat from building up in early season hunts, and grips your clothing, making sure it doesn't create noise while moving to your tree stand. The Ultralight Harness provides all-day comfort, whether you're sitting in a tree stand or long treks into the woods.
