

D-RING EXTENDER

The 18" D-Ring Extender quickly and easily adds length to the back D-Ring of harnesses. This enables easier lanyard attachment while wearing your harness. The snap hook component of the 18" D-Ring Extender attaches directly to the harness dorsal D-Ring. The 18" D-Ring Extender becomes the new connection point to the harness. Simply connect your lanyard to the O-Ring on the extension and you're ready to go. Not for use in leading edge / foot-level tie-off applications.

Key Features

- Product Weight: 1.3 lbs.
- Lightweight
- Easy Access to D-Ring
- Meets ANSI Z359.1-2007, ANSI A10.32-12, OSHA 1926 Subpart M, OSHA 1910
- ANSI Z359 Compliance Capacity Range is 130-310 lbs.
- Material: Polyester and Galvanized Steel
- Minimum Breaking Strength: 5,000 lbs.
